

JLT CLAMPS

Over 114 Years of Clamping Technology

THE TAYLOR CLAMP

#812B SERIES CLAMP

(replaces #302 / #202)

Features:

100% steel construction with a lifetime warranty on all welded components

Guaranteed to never to twist, bow or bend

Patented Equalizer Design provides equal clamping pressure from front and rear jaws

Jaws are toed in at a one degree angle to help hold boards in place

Custom lengths available

MEASUREMENTS

Jaw Height: 3-1/2" (2-1/2" optional)

Add optional rocket plate adapters for up to 6" of jaw height

Jaw Width: 4-5/8"

Minimum clamp opening of 5"

Mounting Plates

The included plates easily attach with a bolt over the 1/2" sq. mounting blocks. Easily hang and slide the clamps in one of our JLT stationary racks to create a desired setup.

Heavy-Duty Latch

The laser cut paddle-style jaw latch provides superior engagement into the vertically oriented 1/4" thick serrated drawbar.

Superior Durability and Strength

Tubular steel clamp frame is more rigid over previous C-channel

One-piece welded clamp screw/drawbar assembly

Handle tighten can achieve up to 3000# of clamping force (wing nut version optional)
